Introduction

Principle of Instrument Operation

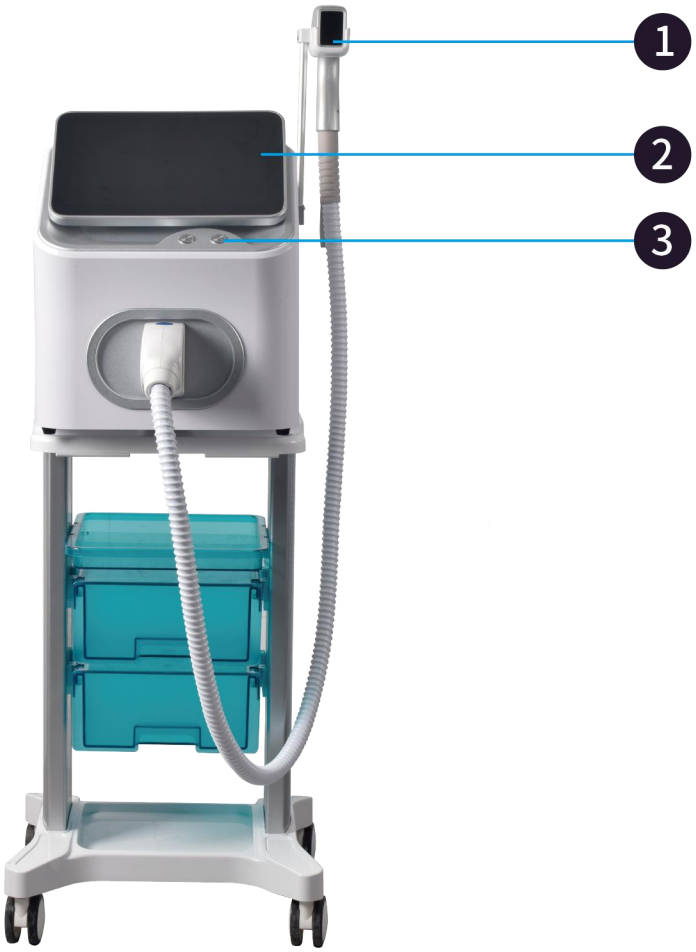

808 freezing point hair removal technology originated from Germany. According to the principle of selective photothermodynamics, through reasonable adjustment of wavelength energy and pulse width, light energy can pass through the skin surface to the hair root hair follicle, causing the hair follicle tissue to be damaged and grow slowly or not, and there is also the effect of skin rejuvenation. The rapid freezing point hair removal system adopts a unique freezing technology. It can cool the local skin to 5 degrees Celsius, overcome the shortcomings of cold touch lighting, convenient and simple operation, no damage to the skin, easy hair removal.

Instrument parameters

Hair removal instrument parameters	
Facula	12*26mm
Pixel	1080x1920
The number of operations	50000000
Wave spread	808nm
Frequency	1-10Hz
Energy	1-50J/cm^2
Overall power	2000W
Pulse width	1MS-20MS
Voltage	200-240V
Heat dissipation	Semiconductor refrigeration + air cooling +TEC refrigeration
Package size	61cm*55cm*57cm
Language	Supports various language customization
Weight	32.5kg

Introduction

Instrument appearance

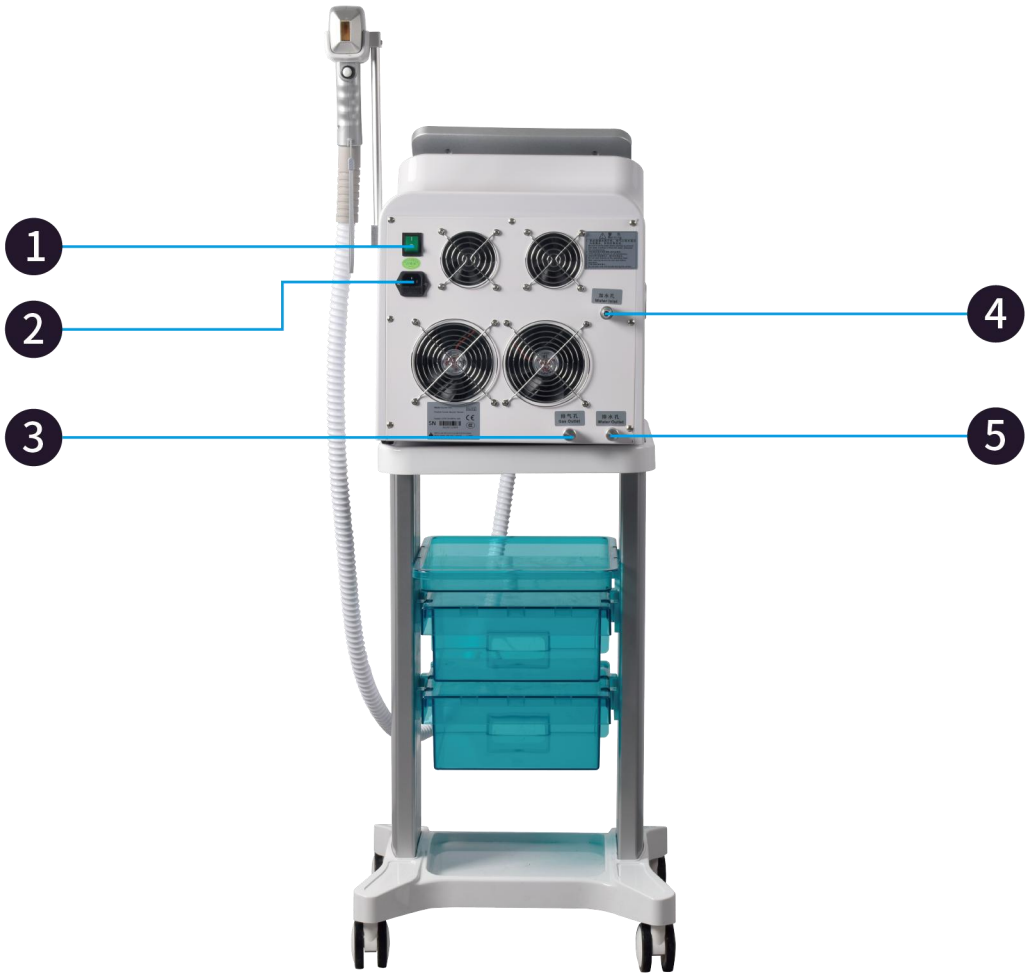

Product front

(Pictures are subject to the actual product)

1. Depilation handle
2. 12Inch display screen
3. PWR

Introduction

Instrument appearance

Product back

(Pictures are subject to the actual product)

1 Power switch
2 Power socket
3 Gas Outlet
4 Water inlet
5 Water outlet

Instructions

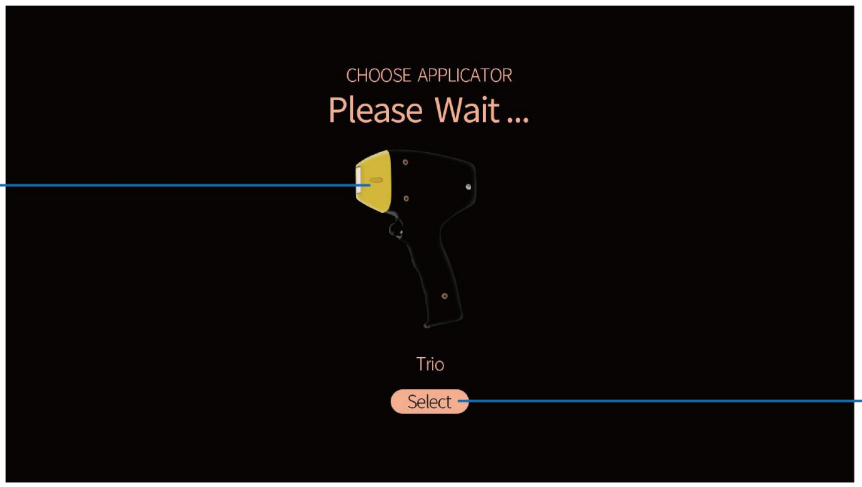

Interface description

Tap the screen to go to the next page

(1-1)

Open the instrument and the main interface appears. Touch the screen to enter the handle selection mode

Click toselect

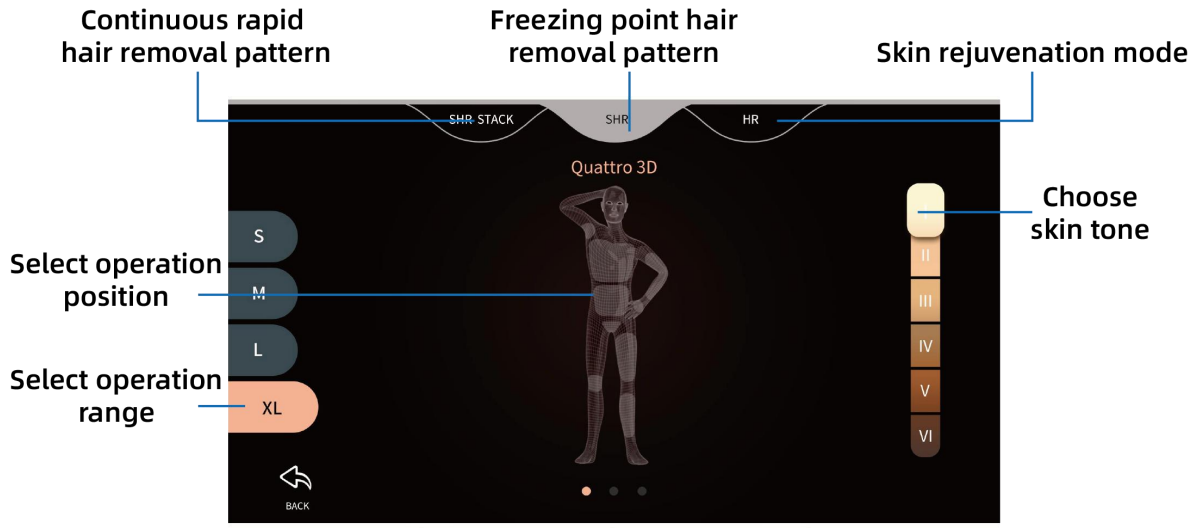

Click to go to the next page

(1-2)

Select a handle to access the operation screen

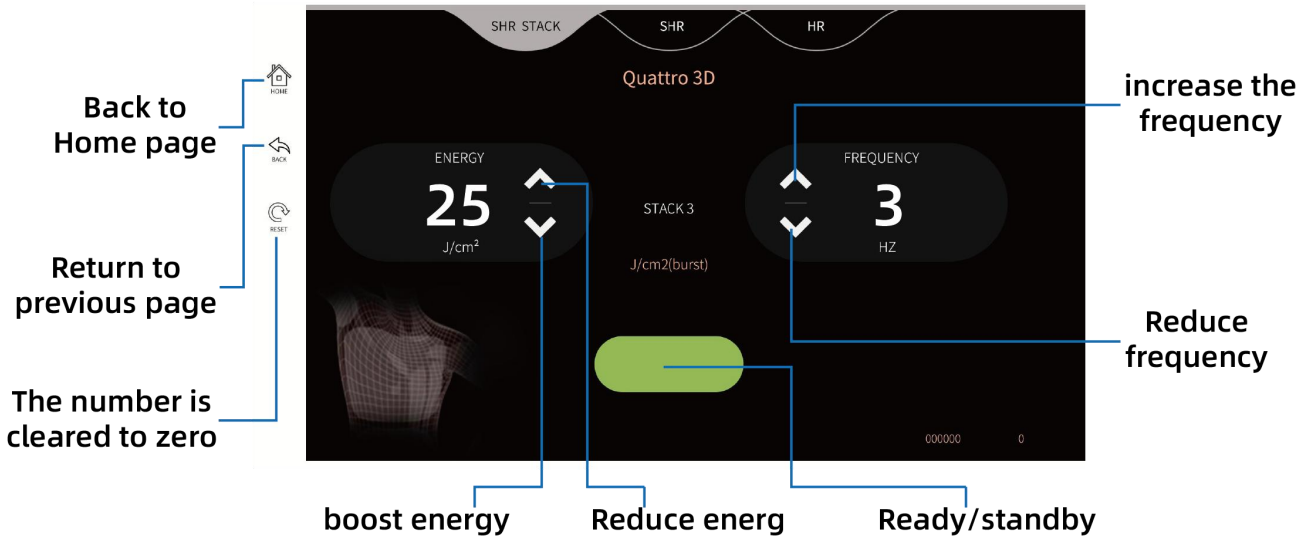

Instructions

Interface description

(2-1)

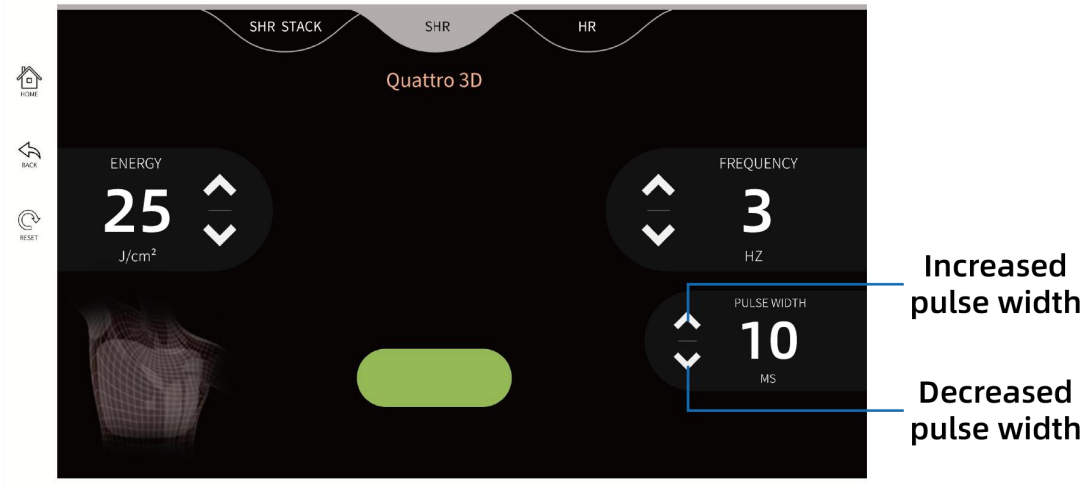

Enter the operation interface "Figure (2-1)" first select the corresponding mode, range size, skin color, and finally select the body part (three dots), click the body part to enter the next page.

(2-2)

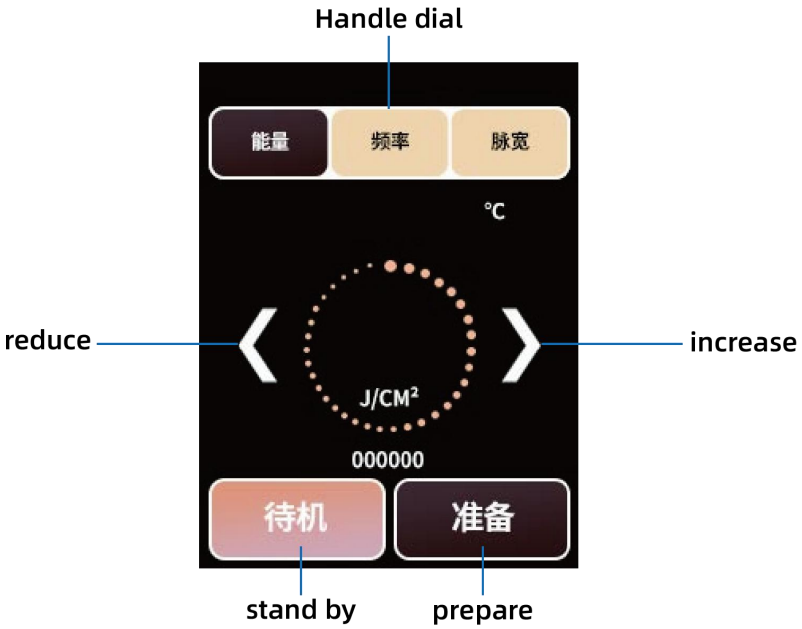

Enter the "operation interface" (2-2), adjust the energy, frequency, (refer to the "Parameter Setting table"), click the "Ready" button for treatment.

Interface description

(3-1)

From the operation interface diagram (3-2), adjust the energy, frequency and pulse width (refer to the "Parameter Setting Table"), and click the "Prepare" button for treatment.

(3-2)

FIG. (3-2) shows the handle operation interface. During treatment, mode switching, energy frequency and pulse width can be performed directly on the handle.

Instructions

Parameter setting table

Hair color	Hair color	Pulse width	Frequency	Energy	Time
Yellow skin	Brown	10~15	3~6	Start at20	10 to 15 minutes
Fair skin	Golden	10~15	3~6	Start at 25	10 to 15 minutes
Black and yellow bark	Black	10~15	3~6	Start at 15	10 to 15 minutes

Taboo group

1, Pregnant women, high blood pressure, heart disease, diabetes;

2, People who are allergic to light are prohibited;

3. People with open wounds;

4. People who cannot avoid private life in the near future;

5. Prohibited during menstruation.

Instructions

Matters need attention

1, do not use soap, shower gel within 6 hours of hair removal, and do not make up the treatment area. Isowash treatment,Area, do not use cosmetics on the day do not rub the treatment area.

2. Only use mild skin care formulas after freezing hair removal.

3. Dress loosely and keep dry after freezing hair removal.

4, do not expose to the sun after freezing hair removal, sauna, swimming.

5, do not use scrub, alcohol, antiperspirant after freezing hair removal, and avoid heat in the treatment area when taking a bath,Water, should use warm water.

6, within a week do not eat photosensitive food (such as celery, spinach, vegetables, lemons, etc.) and photosensitive drugs (such as tetracycline, etc.), spicy and irritating food.

Instrument parts list

Part	Quantity
Hair removal handle	1
Power cord	1
Carbon dust	1
Protective spectacles	1

Attention:
The machine is a photoelectric product,During operation， Be careful not to aim at people's eyes， after operation, you need to put the handle into the protective case， revent injury to people by misoperation.
